SUMMARY

Senior Software Engineer with 8+ years of experience building and modernizing enterprise systems through microservices architecture and modern engineering practices. Delivers scalable Spring Boot solutions across banking and government sectors, including migrations from monolithic applications to distributed systems serving millions of users daily. Combines strong technical leadership with the ability to translate complex business requirements into robust solutions, align stakeholders, and drive delivery across 9 mission-critical projects.

RELEVANT WORK EXPERIENCE

Alinma Bank, Riyadh, Saudi Arabia

Senior Java Developer — Jul 2024 – Present

- Design and implement **robust, high-performance microservices** using **Spring Boot**, resolving key architectural bottlenecks and improving system efficiency.
- **Lead project planning and delivery**, managing timelines, technical execution, and cross-team coordination to ensure on-time and successful deployments.
- **Collaborate closely with business and technical stakeholders**, ensuring clear communication, alignment on requirements, and seamless integration across dependent systems.
- Enhance **quality assurance and reliability** by developing comprehensive **unit and integration test suites**, significantly reducing manual testing effort and release cycle times.
- **Migrate legacy PL/SQL implementations** to a modern **microservices architecture**, enhancing scalability, maintainability, and performance across core systems.
- **Own the centralized ZATCA e-invoicing service** as a service provider for multiple banking teams, guiding their integrations and gathering requirements directly with the business to ensure the service meets their needs.
- **Managed the Elasticsearch rollout** with a third-party vendor, then delivered follow-up requests beyond the vendor's contract myself, including data modeling, parsing, and safe search.

ProInt, Cairo, Egypt

Senior Java Developer — Dec 2023 – Jun 2024

- Engineered backend solutions using **Spring Boot**, achieving **85%+ unit test coverage** and ensuring high reliability and performance.
- Collaborated in **UML definition and business gap analysis** before development to align implementation with business needs.
- Worked within an **Agile environment**, contributing to sprint planning and refinement discussions.

DXC Technology, Cairo, Egypt

Senior Java Developer — Jun 2022 – Dec 2023

- Developed and maintained **backend services** using **Spring Boot**, integrating unit and integration tests across **5+ modules**, improving reliability and user satisfaction.
- Participated in **Agile ceremonies,** including 3 Amigos sessions to clarify and enhance user stories and ensure accurate delivery.

Asset Technology Group, **Cairo, Egypt**

Senior Software Engineer — Feb 2021 – Jun 2022

- Collaborated closely with business analysts and stakeholders to identify business requirements and analyze user needs.
- Built scalable backend solutions with Spring Boot for governmental organizations.
- Designed advanced process solutions using OpenText's ECM & EIM tools, enabling real-time tracking of shared resources across users.
- Implemented bi-weekly knowledge-sharing workshops for newcomer team members focused on business knowledge and technical practices; contributed to an increase in project delivery speed by reducing onboarding time by four weeks.

Software Engineer — Feb 2019 – Feb 2021

- Created web applications for government organizations using Spring Boot.
- Used OpenText ECM&EIM Products to develop complex process applications.

Projects

ZATCA Integration (Alinma Bank)

- Centralized backend service used by multiple banking modules to securely clear and report invoices, ensuring compliance with Saudi e-invoicing regulations and reducing operational costs.
- As owner of the shared service, acted as service provider for consuming teams, guiding them through integration and keeping all modules aligned on one contract. Worked directly with the business to gather requirements and make sure the service fulfilled their needs.
- Tech: Spring Boot, Kafka, IBM MQ, Oracle, Hibernate, JUnit

Elasticsearch (Alinma Bank)

- Project manager for the bank's Elasticsearch rollout: coordinated the third-party vendor responsible for installation and implementation, resolved blockers, and ensured alignment with internal systems and standards.
- When other teams raised follow-up requests outside the vendor's contract, built the solutions myself: index data modeling, data parsing, and a safe search layer.
- Tech: Elasticsearch

Qattah (Alinma Bank)

- A tool for tracking shared expenses and balances with housemates, groups, trips, friends, and family, improving financial visibility and accountability.
- Tech: Spring Boot, Oracle, Hibernate, JUnit

Iz referral campaign (Alinma Bank)

- System delivering personalized customer recommendations from trusted sources, enhancing engagement and conversion rates.
- Tech: Spring Boot, Oracle, Hibernate, JUnit

ABNAEY (ProInt)

- SaaS platform for educational institutions, streamlining school hub management and enabling external centers to efficiently oversee services.
- Tech: Spring Boot, Postgres, Hibernate, JUnit, TDD, AWS

London Market (DXC Technology)

- Digitization of Lloyd's insurance marketplace to automate processing, improve efficiency, and enhance digital capabilities across multiple organizations.
- Tech: Spring Boot, Hibernate, JUnit, TDD, AWS

Mercedes-Benz Daimler Trucks & Vans Manufacturing Execution System (DXC Technology)

- Manufacturing Execution System deployed across Mercedes plants in Europe and the USA, optimizing production processes and real-time monitoring.
- Tech: Spring Framework, Oracle DB, Apache Camel, AMQ

Egypt's Administrative Control Authority (Asset Technology Group)

- Centralized correspondence management solution, handling incoming, outgoing, and internal correspondence to improve workflow efficiency
- Tech: Spring Boot, VueJS, OpenText AppWorks & Content Server

UAE Ministry of Defense Automation Application (Asset Technology Group)

- Automated daily ministry operations covering 150 internal processes across six verticals, including Event, Task, Contact, Risk, Meeting, and Policy Management.
- Tech: Spring Boot, SQL, JavaScript, HTML/CSS, jQuery, OpenText AppWorks & Content Server

EDUCATION

Ain Shams University, Cairo, Egypt 2018

B.Sc. Computer & Information Science (Computer Science) – Very Good

Udacity, Cairo, Egypt. Machine Learning Nano degree 2018

SKILLS

Programming Languages: Java (Primary), JavaScript, Python

Technologies & Frameworks: Spring, Spring Boot, Hibernate, Spring Core, Spring MVC, JUnit

Messaging & Integration: Apache Camel, Kafka, Amazon SQS, Amazon SNS, and IBM MQ

Search: Elasticsearch (data modeling, parsing, safe search)

Containers: Docker

Concepts: Domain-Driven Design (DDD), Microservices Architecture, Distributed Systems, SOLID Principles, Design Patterns, OOP, TDD, Algorithms & Data Structures, Agile Development

Database: SQL, OracleDB, MS SQL, PostgreSQL, DynamoDB, PL/SQL

DevOps: OpenShift, Jenkins, Spinnaker, Azure Pipelines, Git

Spoken Languages: Arabic (Native), English (Professional)
